

As a full-scope **environmental service provider** we understand the challenges associated with coordinating multiple disciplines and contractors on site. We have invested in the best equipment on the market to **reduce downtime** and ensure **project timelines are met**, while providing a fully **integrated service offering**.

Our environmental professionals are our equipment operators. Professionally trained, they operate the equipment **responsibly and sustainably, proactively mitigating risk and assessing the surroundings**, a skillset that sets us apart from conventional service providers and equipment operators.

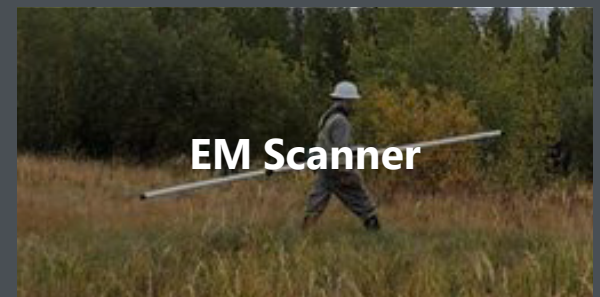

## Key Advantages

 **Integrated Offering**  
Offering a comprehensive understanding of the asset retirement portion of the O&G facility life cycle and the associated challenges of coordinating multiple disciplines as a part of a collaborative execution plan. We are a full scope environmental services firm.

 **Modular Service Offering**  
Providing full life-cycle reclamation and remediation services and are able to effectively coordinate all asset retirement activities or if you have a provider selected and just need specific services contracted, we do that too.

 **Rapid, Low Cost - Deployment and Mobilization**  
Understanding the reclamation & remediation space and key project development timelines, working with clients to meet them proactively with a goal of getting to site closure as effectively and efficiently as possible. Allows our team to offer fast deployment, transitioning from planning to execution seamlessly.

 **Responsible and Sustainable Operators**  
Our operators are environmental professionals and take a pragmatic approach to sampling and data collection.
