

# TRUSTED PARTNER

As a full-scope **environmental services provider**, we understand the challenges associated with coordinating multiple disciplines and contractors on site. We have invested in the best equipment on the market to **reduce downtime** and ensure **project timelines are met**, while providing a fully **integrated service offering**.

Our environmental professionals are our equipment operators. Professionally trained, they operate the equipment **responsibly and sustainably, proactively mitigating risk and assessing the surroundings**, a skillset that sets us apart from conventional service providers and equipment operators.

## Key Advantages

 **Integrated Offering**  
H3M has a comprehensive understanding of the asset retirement portion of the O&G facility life cycle and the associated challenges of coordinating multiple disciplines, as part of a collaborative execution plan.

 **Modular Service Offering**  
H3M provides full life-cycle reclamation and remediation services and effectively coordinate all asset retirement activities. If you have a provider selected and just need specific services contracted, we do that too.

 **Rapid, Low Cost - Deployment and Mobilization**  
H3M understands the reclamation and remediation space and key project development timelines. We proactively work with clients with the goal of getting to site closures as effectively and efficiently as possible. By offering rapid deployment we are able to seamlessly transition from planning to execution.

 **Responsible and Sustainable Operators**  
Our operators are environmental professionals and take a pragmatic approach to sampling and data collection.
